

FOCUS ON

Employment tax solutions for leasing companies and their customers

We at MHA MacIntyre Hudson have considerable experience of working with car leasing companies to ensure they are aware of the tax issues surrounding the arrangements they are introducing to their customers.

We have experience of:

- 1. Car leasing products for customers.** Helping leasing companies to introduce particular leasing products for their customers and to work with them to ensure that these are robust and will not give rise to HMRC challenge.
- 2. Implementation of HMRC compliant leasing arrangements.** Being engaged by the leasing company to work with their customers to implement arrangements and to gain HMRC approval.
- 3. Employee guidance on car leasing arrangements.** We have worked with leasing companies to ensure their employees are aware of the current tax rules in relation to company car taxation and can offer a helpline where specific queries can be posted. We have given training to those working for the leasing concern and spoken at customer forums.
- 4. Tax technical guidance for leasing companies.** We have also worked with leasing companies to prepare white papers on tax changes and to provide magazine updates.
- 5. Employer compliance reviews.** In regard to the leasing companies own employees we can ensure that they have no employer risk by undertaking employer reviews and assisting in negotiation with HMRC.
